Evening Brief

Date: Friday August 10th, 2018

Weather Summary

***** Stronger SW winds on Saturday over western NV and western ID and moving over eastern ID on Sunday*****
***** Mixed wet/dry thunderstorms expand northward into central UT on Saturday and over much of UT and southern/eastern NV on Sunday.**

The strong high pressure ridge will breakdown late Friday into Saturday, as a low pressure trough pushes down across the Pacific NW. This will increase SW winds across parts of the Sierra Front and for Western ID Saturday, spreading eastward across a larger portion of the Nrn Great Basin Sunday, where **High Risk** has been issued for gusts of 30 mph and low RH/Dry Fuels.

Isolated showers and thunderstorms will spread northward across parts of NV & UT this weekend. The northern edge of this lightning will be drier, and occurring over near record dry fuels, with **High Risk for Lightning** in effect some areas (see 7-Day Map). Southern areas will see a trend to wetter showers and thunderstorms, with fuels modifying significantly by early next week.

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	5	Light Initial Attack Activity
National	5	New Fires and Acres: 9 fires 4.3 acres; 6,146 acres large fire growth

Great Basin Fuel Status [interactive link](#) (Use Edge, Chrome or Firefox browsers)

Fuels and Fire Behavior advisory has been issued for [Northern Great Basin](#)

Fuels/Fire Potential

A Fuel/Fire Behavior advisory has been issued for North/West Nevada into Idaho and Northwest Utah. This advisory can be found here: <https://gacc.nifc.gov/gbcc/fuels.php>

ERC's are mainly in the 80th - 97th percentile across Northern parts of NV, northern half of UT and ID, where many areas are near or just below record highs for the time of year. Wyoming ERC's are also steadily rising above the 70th - 90th percentiles.

Sagebrush Live Fuel Moisture levels across most areas are near early August normals, and grasses are cured in all areas, except the highest elevations above 7000 ft in Idaho and Western Wyoming.

ERC's have risen above the 50th percentile across most of the southern third of Nevada, Utah, into the AZ Strip, with several stations in the 70th-80th percentile, which is near record levels for this time of year in those southern areas.

Hot and dry weather the next few days will continue pushing those ERC's higher across the entire Great Basin this week, although increasing moisture across southern areas this weekend should knock fuels down considerably.

Resources:

Aviation within the Great Basin

- 0 VLAT's, 3 LATs, 2 CL-415
- 21 SEATs, 2 Fire Bosses
- 9 Type 1 Helicopters / 9 Committed
- 9 Type 2 Helicopters / 5 Committed
- 22 Type 3 Helicopters

Crews Committed within the Great Basin

- 11 IHCs Committed / 0 Available
- 32 T-2 IAs Committed / 0 Available
